

Need help getting into BIM?

The Government Construction Strategy, published by the Cabinet office on 31st May 2011, announced the Government's intention to require collaborative 3D **Building Information Modelling (BIM)** on its projects by 2016.

Organisations in the construction industry unable to deliver BIM services will be at a major disadvantage compared to competitors.

For those who realise the need to move into this increasingly important area but lack the resources to navigate the emerging standards and technologies, this FREE event will highlight the funding and support available.

Date: Thursday 19th March 2015
Time: 2pm to 4pm
Venue: Wolverhampton Visualisation Centre, University of Wolverhampton Science Park

- Martin Huggins, from the Faculty of Science and Engineering, School of Architecture & the Built Environment at the University of Wolverhampton, will provide an overview of BIM.
- Alec Gilham, from the West Midlands Manufacturing Club, will explain how companies can benefit from five days of funded support available to assist with BIM training costs.

Companies attending will also have the opportunity to sign up for 2 days support from the Innovation 1st programme, part-funded by the European Regional Development Fund.

Who should attend?

As BIM affects all involved in the construction industry, any companies involved in Design, Planning, Management, Civil Engineering, Building Construction, Facilities Management, Quantity Surveying or Manufacturing should attend.

There is no cost to attend but pre-registration is required.
